DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-60, drawn to an apparatus for analyzing a sample containing one or more fluorescent species, and a method in which the apparatus is used, classified in class 356, subclass 417.
 - II. Claims 61-71, drawn to a method of identifying sample components, and in which oligonucleotides are bound to the surface of a substrate, classified in class 435, subclass 6.
 - III. Claims 72-77, drawn to a device that generates plural excitation lines, and a method in which the plural excitation lines enable the illumination of a sample.
 - IV. Claims 78-84, drawn to methods of controlling a sequence of excitation lines, classified in class 372, subclass 23.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions are directed to the analysis of a sample containing one or more fluorescent species, the identification of sample components in which oligonucleotides are bound to the surface of a substrate, the illumination of a sample, and the control of a sequence of excitation lines.

Art Unit: 2851

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michelle Nguyen whose telephone number is 703-305-2771. The examiner can normally be reached on M-F 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Russ Adams can be reached on 703-308-2847. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
